DETAILED ACTION

Response to Amendment

Response to Arguments

1. Applicant's arguments filed 9/30/2004 have been fully considered but they are not persuasive. Lee et al. disclose a tungsten layer disposed between a tungsten plug and the adhesion layer. Lee et al. fail to disclose the adhesion layer to be tungsten silicide. However, Cadien et al. disclose tungsten silicide adhesion layer. Examiner agrees with the applicant's representative that neither Lee et al. nor Cadien et al. by themselves disclose the required interconnection structure. However, their combination, with the necessary motivation do teach the whole claimed invention.

Allowable Subject Matter

2. Claims 12-16 allowed.
3. Claims 2, 5, 6, 8, 10, 18 and 19 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3, 4, 7, 9, 11 and 17 rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. (5,956,609) in view of Cadien et al. (5,604,158).

Regarding Claims 1, 3, 4, 7, 9, 11 and 17, Lee et al. disclose a method for reducing stress and improving step-coverage of tungsten interconnects and plugs where in Fig. 3E, a tungsten layer 52 is situated between a tungsten plug 54 and adhesion layer 50. Lee et al. fail to disclose the adhesion layer to be tungsten silicide. However, Cadien et al. disclose an integrated tungsten/tungsten silicide plug process where in Fig. 3C, the tungsten silicide adhesion layer is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required tungsten silicide adhesion layer in Lee et al. as taught by Cadien et al. in order to have a semiconductor device with higher performance.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2826

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
